

NON-TECHNICAL COURSES

“NATIONAL SERVICE TRAINING PROGRAM (NSTP): CIVIC ENGAGEMENT IN COMPUTER ENGINEERING”

INTRODUCTION

The National Service Training Program (NSTP) is a series of online courses and leadership programs for tertiary students. In the context of Computer Engineering, it integrates technical skills, education, and social responsibility, fostering social responsibility and practical application of knowledge for public good.

SIGNIFICANCE TO THE CURRICULUM

Bridges the gap between the theoretical computer engineering concept and practice. It fulfills the mandate of developing students' civic consciousness and defense preparedness, while enhancing soft skills like leadership and teamwork.

KNOWLEDGE & SKILLS GAINED

- **Technical Application:** Applying programming, networking, and software to real-world community issues.
- **Project Management:** Planning, executing, and evaluating community-based technical projects.
- **Problem-Solving:** Identifying and creating innovative solutions for complex problems.
- **Civic Awareness:** Understanding social issues and the role of technology in civic engagement.
- **Leadership:** Guiding teams and initiatives towards common civic goals.

CAREER OPPORTUNITIES & PROFESSIONAL GROWTH

Opens doors in social entrepreneurship, government agencies, and tech companies valuing social impact. Positions graduates for leadership roles in key industries such as IT, STEM, civic good, humanitarian engineering, and civic technology.

ADVANTAGES

Enhances resume and professional profile with demonstrated commitment to social responsibility. Provides practical experience in applying engineering solutions to real-world problems and building community leadership.

CHALLENGES

Time Management: Balancing academic workload with NSTP commitments.

Resource Constraints: Limited budget or technology in project management.

Community Engagement: Ensuring sustainable and meaningful impact for the community.

Team Building: Integrating diverse perspectives and conflicts within project teams.
